COOKING REVIEW / QUICK GUIDE

Would this replacement work?

Judge each suggestion in its recipe. You are not choosing a winner.

1. Read the recipe once

Read the title, ingredients, the ingredient being replaced, and any supplied cooking context. Keep the intended dish in mind. No cooking or tasting is required.

2. Give every suggestion one answer

A	**Works as-is** The dish stays recognizably the same. Ordinary quantity adjustment is fine; no meaningful change to the recipe is needed.
C	**Works with a change** It needs a meaningful change to quantity, cooking technique, or a companion ingredient. The intended dish is still preserved.
N	**Does not work here** It breaks the ingredient's role or the dish's identity, makes no sense, is too vague to use, or is just the original ingredient again.
U	**I cannot judge** You do not know the ingredient, lack needed cooking context, or cannot make a defensible judgment. This is a valid answer, not a failure.

A quick way to decide

Could I use it without a meaningful recipe change? A. Only after a meaningful change? C. I can explain why it would not work? N. I do not have enough knowledge or information? U. Do not choose N merely because you personally dislike an ingredient.

3. Keep your judgments your own

Work separately from the other reviewer. Do not compare answers or use an AI assistant to decide labels. More than one suggestion can work; all can fail. Judge every suggestion, not only your favourite. A culinary A is not an allergy or food-safety approval.

4. Keep it easy and honest

Read the context once, then work through that recipe's suggestions. If useful, add a short note for C, U, or unclear wording. Take breaks. If the recipe is unreadable or essential context is missing, flag it to the coordinator; do not invent the missing information or replace the case.

5. Finish your own file

Use only your assigned review pack. Keep completed answers saved. Return the completed pack/export through the coordinator's agreed private channel, including unfinished or flagged cases. Do not rename or rewrite case/candidate identifiers, delete difficult items, or turn unanswered items into N. Disagreements are reviewed later; do not force agreement now.
